

Exam 3b – ASP.NET Localization

MSCI:3300 – Software Design & Development

Due **Monday, December 15, 2014 @ 8:00am**

This take home, programming exam is worth **30 points**.

You have been asked to create a simple one page web site that allows the user to interact with the page in 4 languages – Arabic, Chinese, English, and Spanish. See the attached wireframe diagrams for specific page details.

1. **All** text on the page must change based on the language selected.
2. Web site should be active and usable on your Instruct in folder **Exam3b**.
3. Nothing should be saved to a database. Collect the variables from ASP inputs and return them in ASP labels.
4. You may use any resource at your disposal, except another person. This is an individual effort.
5. All development must stop on Monday, December 15, 2014 at 8:00am.

Late submissions will not be accepted.

6. Please use Github for source code management.
